

# HARRIMAN LINES MAY SEPARATE

Union Pacific Commisary Department Segregated From Balance of System.

## MAY PRESAGE OTHER CHANGES

F. E. Lewis Goes to Omaha as Superintendent of U. P. Service—F. W. Gentsch Probable Successor.

(Special to The News.)  
Ogden, Nov. 23.—What may be the presage of the separation of the lines of railroad heretofore comprising what is known as the Harriman system occurred here today. It was nothing less than the separation of the Union Pacific commissary department from the system interests and the installation of the hotel and dining service of the Union Pacific as a separate identity of that road.

In effecting the change, F. E. Lewis, who has been superintendent of the hotel and dining car department of the Harriman lines, becomes general superintendent of the service on the Union Pacific, and his office will be transferred to Omaha. With him will go a large force of men, including Auditor F. X. Hoss and several of his clerks. The change is to take place about Dec. 1.

The separation of the commissary departments seems to indicate that other departments may also be divided and that ultimately a complete separation will take place in the various railroads which go to make up the Harriman interests. The recently constructed commissary building at this point will be used as a distributing station and it is more than likely that the Oregon Short Line will maintain it as a supply depot and that the superintendent of the dining car and hotel departments of that line will remain in Ogden.

### GENTSCH SUCCESSOR

F. A. Gentsch, assistant superintendent under Mr. Lewis, will more than likely be named as the new superintendent of the Short Line interests at this point. Mr. Gentsch has had a very broad experience, fitting him for the position and the expected promotion will come as a fitting reward for past services.

### WESTERN PACIFIC ROSTER

San Francisco, Nov. 23.—The following appointments were announced yesterday at the offices of the Western Pacific:

R. M. Ketchum, formerly superintendent of the New York division of the Lackawanna railroad, was made superintendent of the western division with headquarters at Sacramento.

R. M. Odette, formerly with the Chicago, Burlington & Quincy, was made superintendent of the eastern division, with offices at Elko, Nev.

Matt Sawyer, formerly construction trainmaster of the Chicago, Milwaukee & St. Paul, was appointed trainmaster at Sacramento.

O. W. Meadows, formerly trainmaster of the Santa Fe at San Bernardino, is announced as chief dispatcher at Elko, Nev. C. M. Stansbury, at one time connected with the Southern Pacific at Elko, Nev., to be master mechanic at that point.

E. W. Mason, to be superintendent of telegraph with offices in this city.

T. M. Schumacher, general traffic manager of the El Paso & Southwestern railroad, who will become vice president of the Western Pacific Dec. 1, in charge of traffic west of Denver, arrived here last night for a conference with officials of the new road.

### BURLINGTON WESTWARD BOUND

(Special to The News.)  
Chapel, Wyo., Nov. 21.—McArthur Bros., the railroad contractors, have been awarded a contract to build 65 miles of grade on the Burlington's north and south line from Bad Water to Powder river, on the Chicago & Northwestern. The awarding of this contract removes all doubt as to the intentions of the Burlington in central Wyoming.

### UNDERWRITE M. P. BONDS

Kuhn, Loeb & Co. of New York have underwritten a \$175,000 bond issue for the Missouri Pacific to make improvements. Railroad men generally say this means that Gould intends to have as good a transcontinental route as money can make.

### LOOKING FOR JOBS

Quite a number of railroad operatives have gathered in this city, hoping for a job on the Western Pacific when that road opens Dec. 1, for through freight business. Not a few of the Grand operations from the mountains are anxious for a change to the new road, as running trains in winter over the Rockies is not very exhilarating. Freight and passenger cars are now being carried to this from this city.

### SPIKE AND RAIL

General Agent J. G. Doolittle of the Rock Island road has returned from his New York trip. He attended while there a large banquet given at the Waldorf-Astoria hotel by the Railway Business association.

**Phoenix Mufflers**  
FOR  
**STYLE AND COMFORT**

# Peptiron Pills

Ironize the blood, tone the nerves, strengthen the stomach, aid digestion, and promote sweet, restful, natural sleep. They are chocolate-coated, acceptable to the stomach and easily assimilated, and the best medicine for anemic, pale, nervous and dyspeptic men, women and children, and all sufferers from the effects of the strenuous life of today. Price 50c. or \$1. Of druggists or by mail. C. I. HOOD CO., Lowell, Mass.

## SCIENTISTS TO BUILD BIG CHURCH EDIFICE

Congregations Outgrowing Present Structures—Second Church Now in Court as a Preliminary.

The Christian Scientists of Salt Lake are going to build a fine new edifice which when completed will compare favorably with any of the religious structures of the city.

For some time past the members of the two congregations, now existing in Salt Lake, have faced the problem of finding seats for the constantly increasing numbers who are joining the faith. Not a service has been held but that there was a crush and the conditions finally became so serious that some action was necessary.

For this reason the two churches decided to join forces, in a business way, and filed in the district court the necessary papers. As soon as the legal action is brought to perfection the preliminary steps looking toward a new, handsome and commodious home will be taken. The plan as yet is but in swaddling clothes but it is a lusty and growing infant.

"The papers filed in the court a few days ago were necessary in a business way," said Clarence B. Stevens, first reader of the Second Church of Christ, this morning. "There are no religious differences whatever and the action was taken only because it seemed to us to be about the best way out of our present difficulties. The fact of the matter is that we are seeking a way to accommodate our very largely increased membership. The edifice where we are worshipping now are entirely too small."

"The excommunication of Mrs. Stetson and her followers in New York has nothing to do with this," he said. "Not in the least. There is nothing but harmony among us. It is just a matter of providing a church which will enable us to worship in comfort. We have not looked at any property. It has not got to that stage yet. But we are going to build and when we do there will be another ornament added to the long list of fine church buildings in Salt Lake."

Mr. Stevens would not say how much of an investment would be made in the new property, nor would he give an idea as to a probable location. He said that when the plans were made the future increase of the congregation would be taken into consideration. While he would not say so definitely, the impression was given that both of the present churches would be given up and the two congregations merged into one.

The two churches of the Christian Scientists are located almost within hailing distance of each other. The First Church is at 336 east Third South, and the Second church at 29 Third East. Of the former congregation N. A. Tyler is the first reader and Mrs. L. A. Raybould the second. Clarence B. Stevens and Mrs. Clara A. Keyser occupy similar positions in the Second church.

### ELECTRIFICATION OF LINE.

Saltair Company to Begin Work Soon Under New Franchise.

The Los Angeles & Salt Lake Railroad company was granted a double track franchise by the county commissioners Monday from the city limits to Saltair and the electrification of the line will begin within a short time. Joseph Nelson, president of the company, and J. E. Langford, general manager, appeared before the commissioners and accepted a few amendments to their franchise. The franchise runs for years and is forfeited unless work is begun within a year. A new franchise was granted the Telluride Power company, making a few changes in the present franchise.

### MACKENZIE FINDS IT.

The Pole Was Where Dr. Cook Left It—To Be Exhibited Here.

The Cook-Pearry controversy is soon to be a thing of the past—thanks to the Press club and the heroism of A. G. Mackenzie, who is supposed to be a telephone man, but who in reality is a noted explorer, undiscovered until the Press club found him.

Recently Mackenzie was informed that it was up to him to write an opera for the Press club concerning polar wanderings of Cook and Peary. Accuracy is one thing for which Mackenzie is a stickler and to get at the exact truth so that it may be properly portrayed by the famous actors of the Press club, he went north. It was supposed he had gone on telephone business, but the fact has just leaked out that he has been engaged in tracing the footsteps of Cook and Peary, going over

# MAN IS NO BIGGER THAN HIS STOMACH

Napoleon Conquered the World But Met Final Waterloo In His Digestion.

## EXPERTS' HEALTH THEORIES

Many in Salt Lake Try to Cheat Nature, but Fail, Says Easterner.

The Cooper "stomach man" who is now in Salt Lake and has aroused widespread comment by his new theories about the human stomach, when interviewed yesterday said:

"When I first came to Salt Lake I said that the digestive organs of the American people are degenerating. That was the reason, I claimed, why half the people of this city are suffering from chronic ill-health and don't know why."

"A man is no bigger than his stomach. Not one person in a hundred realizes what this means, but history proves it. Take Napoleon Bonaparte. There was a man who conquered the world. But he couldn't conquer his stomach. He died of overeating."

"Hundreds of people right here in Salt Lake are like him. They think they can go on stuffing themselves with all kinds of rich food and not suffer the consequences. They do not realize that when they have a mass of half digested food decaying in a stomach that isn't able to take care of it they have a poison factory going right where it will do the most harm."

"I have met literally hundreds of thousands of persons who have called to consult me in the large cities of the Pacific coast and in the east. Yet of all these people, suffering from various diseases—constipation, kidney trouble, liver complaint, headache, dizziness, pain in the side and back, nervousness, general debility and everything else they could think of—yet, I say, when I gave a course of stomach treatment to these people in almost every instance they have found relief."

"People are too apt to gorge themselves with food. The business man who sits all day in his office, or the woman who makes little invigorating outdoor exercise, eats as much as a day laborer. The extra amount of food they take lies heavy and soggy on the stomach. They make a man feel sluggish and tired, he is cramped, half sick and exhausted all the time. The stomach gets clogged, won't work, and the fermenting food forms gases, poisons the blood and causes various complaints, all resulting from one central cause—stomach trouble."

"My treatment simply tones up the stomach. It restores it to a healthy, normal condition and enables it to do its work as nature intended. Building up the stomach improves the whole system. When every meal digests properly, the blood is good, rich, clear, the nerves and muscles as nature intended they should be, the whole body is overflowing with life and health. The patient is literally a new man."

The Cooper "stomach man" as he is known in the east, is meeting the people of Salt Lake at the Sun Drug store at "The Busy Corner," daily. From the number of persons who call to consult him, he would seem to be making many converts here.

each route step by step until he discovered the pole. This furnishes ample proof, as will be clearly seen.

Following the presentation of this great opera, the entertainment will be concluded with "A Night at the Press Club," which will contain some real surprises.

### NEVADA QUARANTINE LAW.

Sheep of Utah, Idaho and Wyoming May Not Enter There.

Nevada has quarantined against Utah, Idaho and Wyoming sheep, and part of the state of Wyoming has been quarantined by the government, on account of the spread of the leg and lip disease. It is charged that the action on the part of Nevada is due to a desire to keep foreign sheep out of the state during the winter so that the winter ranges may be utilized by Nevada owned sheep. As large herds of sheep that summer range in Idaho, Utah and Wyoming, have been wintering in Nevada, the result will be a congestion on the scanty winter ranges of these three states. State Veterinarian Young does not believe the Nevada quarantine will be enforced.

### INQUEST IN NELSON CASE.

Passengers to Testify at This Afternoon's Hearing.

Justice of the Peace and Acting Coroner Stanley A. Hanks called a coroner's jury, including A. Q. Miller, J. J. Clinton and L. P. Hansen, Monday afternoon, to hear testimony in the investigation of the death of young Leon Nelson, of Sandy, who was killed by a Murray street car at Eleventh South and State streets, last Saturday night. The witnesses included conductor R. H. Smith, Motorman J. H. Wilkinson, and Conductor Haltemann. The hearing was continued until 5 o'clock this afternoon, when passengers on the north-bound and south-bound cars will testify. Conductor Smith testified to the fact that Nelson got on his car at Murray, a little after 9 o'clock, Saturday night; that Nelson got off at Eleventh South street, when he saw an object on the track in front of him, but that it was too late for him to stop the car, and the trucks ran over the body. In the business district, the heavy rain storm obscured his view of the track ahead. Conductor Haltemann, in charge of the same car, corroborated Wilkinson, and said he had informed the dispatcher, the Nelson Light & Railway company immediately after Nelson was killed.

# A Big, Old Fashioned Dinner For Thanksgiving Comes High

Turkeys Are on the Rack at Thirty Cents With "Trimnings" Somewhat Dear.

That Thanksgiving dinner is going to be an expensive one this year.

The great American bird, which Benjamin Franklin fought so hard to place upon the national emblem and only succeeded in getting upon the holiday tables is getting away up among the peaks this year and it takes just 30 cents on every pound to bring it to earth—and the oven. But both Mr. Turkey and the Missus have had a beautiful season and are plump and toothsome.

The clucking inhabitants of the barnyard, and incubator farms, are cackling between 22 and 25 cents the pound, and look very handsome because of their increased financial condition in the world over that of last year. And they are very fussy, but eminently useful fowl, for they are aristocratic big brother a very strong race for popularity in the Thanksgiving dinners.

The markets of the city this morning received their shipments of tame birds, turkeys and chicken, for there are very few tame ducks or geese on the market. Most of them come by fast freight in refrigerator cars, from Kansas and Missouri, although there are a considerable number which have received their birth and breeding right in good old Utah. But the local supply does not nearly equal the demand.

For those who love the tang of the wild bird flesh there is a plentiful supply. There is mallard, and teal, and redhead, and pin tail, with an occasional canvasback, while now and then will be found a brace of nice fat geese, which, when stopped in their southern flight through nearly mountain passes. The smaller of the wild fowl are quoted from 30 cents to \$1 a brace, while the geese—well it's luck if they can be obtained at all.

As for the accompaniments, the price of the "feed" will vary with the individual taste. That luscious chestnut, which is quoted from 25 cents to 30 cents for the nut, and that little bit of sage which gives the high lights to this highly gustable picture costs just a little five cent piece the bunch.

And should another taste want oysters for the "suffin" there is the choice of the cave from the Puget Sound estuaries, at two-bits the pint may be—or those aristocratic bivalves from the shores of Chesapeake bay, at a slight increase on this when encased in tin and almost any price which the connoisseur will stand when in their original jackets. And the biscuits, wafers, or common every day old-time oyster crackers which go to form the cementing end of the compound may be purchased at all sorts of prices.

There is a certain little red berry which is loved alike by man and bear and which is so very retiring by nature that it is found in its very best condition far from the ordinary haunts of civilization. It just loves to hide itself in swamps and is so bashful about its development that it is garnered at its best when the ice forms a crust upon which to gather it from the bushes. Yes, it is the cranberry, the sauce to the gander, or the turkey, or the good hen or whatever bird it might be. And this blushing globe is the same as of old, two quarts for 25 cents.

And then there is the sweet "spud" which, correlated with a certain animal called "possum," was made famous by William Howard Taft, the epicure of the White House. Baked to an unbecoming crispness and huge quantities the steaming flanks of the bird which is the piece de resistance of the repast, the sweet brother of the Irish national tuber is a thing of beauty and a joy forever. And it can get just six pounds of him for 25 cents.

Brittle—immaculate celery, which produces the gray matter in the brain and an extreme gratefulness while awaiting the soup, is bunched in the stalls with its feathery toes adding a flower-like touch to a busy scene. And the legends thereon vary from 10 cents for the big fellows to just half that for the more modest bunches.

# Health and Beauty Advice.

BY MRS. MAE MARTYN.

**Corn S.**: As you have so much trouble to make your hair stay up and look neat, try shampooing it twice a month with a teaspoonful of canthrox dissolved in a cup of hot water. This shampoo is the best for your hair, and it keeps the hair-dressers. It produces an abundant lather, dries quickly and not only cleans the hair and scalp, but stops all itching, itching and gives the scalp a feeling of pleasing freshness. Canthrox makes a delightful shampoo and will make your hair soft and fluffy. You will have little trouble then to make your hair look nice. Never use soap for shampooing, as it makes the hair brittle, harsh and takes away the glossy look.

**Mrs. L. E.**: No doubt glasses spoil your looks. Probably you would have no need to wear glasses if you would use a good eye tonic. Get an ounce of crystals, a pint of water and dissolve it in a pint of water. Drop one or two drops in each eye once or twice a day. This is wonderfully strengthening to the eyes, and will not smart or burn, but makes dull-looking eyes bright and clear. It is just fine for dull, tired, inflamed or weak eyes and for granulated eye-lids.

**Della K.**: Face powder will not help your dark face and neck to any extent. It rubs off too easily and does no permanent good. What you need is something to whiten and beautify your skin and take away that dark, coarse look. The finest thing I have ever seen for this is a lotion made from 4 ounces of spirit of rose, a half-pint of water and 2 teaspoonsful of glycerine. Apply a little of this lotion to your face, neck and arms, and see how wonderfully it will improve your looks. It will give you a better complexion and make any sallowness or sallow skin look fresh and youthful. Spirit of rose is inexpensive and I have found it splendid for pimples, tan, freckles, cold sores and a shiny skin. You can get spirit of rose at any drug store.

**C. E.**: The best tonic I have ever used is made by dissolving 1 teaspoonful of Eucalypti and 1 ounce of karene in a half-pint of alcohol, adding enough boiling water to make a quart of tonic. Take a tablespoonful before each meal and before retiring. It will tone up your system, give you an appetite and do away with that tired feeling you speak of. It is fine for clearing up a sallow complexion, arousing the liver, removing liver blotches, pimples and other skin eruptions. I use it myself.

**Mary O.**: Eczema, salt rheum, rashes and other skin diseases can generally be overcome by using a remedy made by mixing 1 ounce of alcohol, 4 tablespoonsful of alcohol and a half-pint of water. Shake bottle and apply the lotion to affected parts three or four times a day, allowing to dry. This will stop the itching and prove very effective if used regularly.

This tonic itself and it keeps my blood in good condition the year around and my face looking healthy.

**Mrs. H.**: You can easily get rid of your excess fat, even though all the remedies you have tried did you no good. Get 4 ounces of parotia from your druggist and dissolve it in a point of hot water and try this. Take a tablespoonful before each meal. It generally cuts down surplus flesh rapidly and will not injure your health in any way. You will feel better and never have to worry about your weight increasing.

**G. E. T.**: You cannot get rid of dandruff permanently by merely brushing the scalp. Your itching scalp and brittle, falling hair with split ends are signs of neglect. Try shampooing your hair every two weeks with canthrox and use a lotion made by dissolving an ounce of quinine in a half-pint of alcohol and adding 1 pint of cold water. Use this tonic regularly and it will remove the dandruff and irritation, stop your hair from falling out and make it soft and glossy. You will find this a very refreshing tonic for the hair and scalp.

**Sibyl H.**: It is a shame for a girl of your age to have wrinkles. No wonder your sweetheart seems to be taking a fancy to your chin, who is better looking. Try this complexion jelly and you will be surprised how it will clear your skin and fill in those horrid wrinkles. This grainless cream can be made by mixing 1 ounce of alcohol, 4 tablespoonsful of cold water and 2 teaspoonsful of glycerine. Stir and let stand. This makes a splendid and inexpensive cream. It will clean the pores, keep the skin free from blackheads, and is excellent for chapped hands and face. I find it excellent for reducing the size of large pores in the skin, and for removing tan, freckles and certain types of pimples. I recommend it for massage purposes. It leaves the skin soft and smooth and contains no grease or oil to cause hair to grow on.

**Mary O.**: Eczema, salt rheum, rashes and other skin diseases can generally be overcome by using a remedy made by mixing 1 ounce of alcohol, 4 tablespoonsful of alcohol and a half-pint of water. Shake bottle and apply the lotion to affected parts three or four times a day, allowing to dry. This will stop the itching and prove very effective if used regularly.

# The Watch

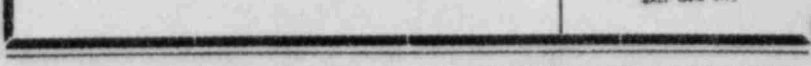

We are all selfish. If a merchant makes good a guarantee to a complaining customer he is called honorable and if he gives the Orphans a donation he is called generous—Now these virtues may exist but behind them both in the average man is the element of selfishness, because he knows he will lose less if he makes good his guarantees and gives to charity than if he does not.

To please a customer first and not be required to make good a guarantee afterwards, should be the merchants first thought in buying goods, and when merchandise is found that, for the price, excels all other similar ware he does well to recommend it to his patrons.

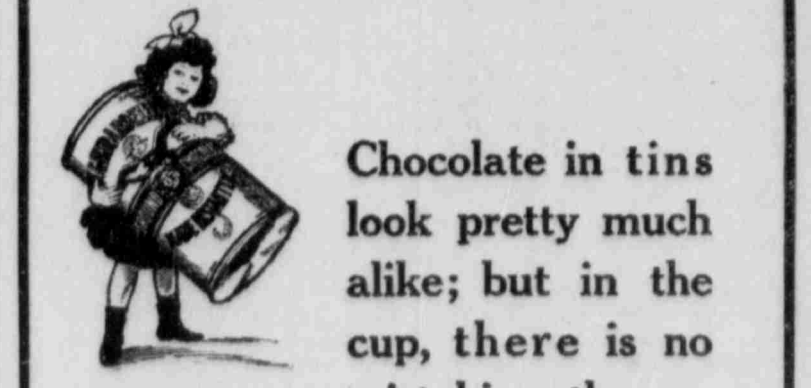

The Leyson Special Watch for men and women excels all others of a similar cost and we recommend them from a selfish motive knowing they will stay sold and make of every owner a friend.

They cost from \$24.00 to \$200.00 and satisfy every watch requirement.

Phone 65 for the Correct Time.

Chocolate in tins look pretty much alike; but in the cup, there is no mistaking the superiority of

**Ghirardelli's**  
GROUND CHOCOLATE

Exquisite in flavor. Perfect and pure.

**Cocoa Fact No. 14**

Don't ask merely for chocolate—ask for Ghirardelli's.

In making coffee or tea only the essence is used and the materials themselves are thrown away because the human system cannot assimilate them. But in cocoa the entire substance is taken into the system and easily digested by the most delicate.
